## **AmpliTech's History, Merits, and Experience**

AmpliTech's Mission Statement clearly states our company's focus and directive:

**"AmpliTech's Mission is to develop quality, state-of-the-art microwave amplifiers through a company built on experience, proven technical expertise, superior design heritage, and complete customer satisfaction."**

Our personnel, both technical and administrative have been in this business for over 25 years. In particular, our expertise is not only in providing the lowest NF amplifiers in the world, but we have also pioneered the art of Space and Hi-Reliability Qualification and Manufacturing while simultaneously providing the most cost-efficient and timely deliveries. We have proven this over and over in our history by delivering to customers such as Raytheon, Boeing, Northrop Grumman, Lockheed Martin, and BAE systems, to name just a few. In addition, AmpliTech is on the APL/QPL for many of these companies and has the distinction of having a **SECRET Government Clearance** as well as being an **SBA (8a) and SBDC certified** Company. Please note that we are currently in the process of obtaining **AS9100** certification and have also recently been **ISO Certified** to demonstrate our dedication to Quality Assurance. AmpliTech continues to grow and is now offering other key microwave products and sub-systems such as oscillators, frequency converters, multipliers, complete front-ends and SS switches among others.

AmpliTech has the advantage of being able to offer not only the best products in the industry, but also the advanced technical expertise and **engineering consulting services** to support our customers, thereby adding a value unequalled by our competitors. Our company is **technically and administratively agile** and can respond quickly to custom requirements and customer challenges. Our products have the unique advantage of **design flexibility** to accommodate any customer changes in parameters due to obsolescence or technology upgrades. If we experience advances in transistor or MMIC technology, our parts can immediately be upgraded as well to remain state-of-the-art. Our **unique topology and experience** also accommodates optimization of individual parameters and specifications as customer's needs change. Therefore, **AmpliTech has many advantages** over our competitors in terms of performance, availability, quality, and customer service.
